## Summary

Java Full Stack Developer with hands-on experience in Java, Spring Boot, Angular, SQL, and RESTful API development. Skilled in building scalable microservices-based applications, implementing secure authentication systems, and developing responsive web solutions. Passionate about creating efficient software applications and contributing to collaborative Agile development environments.

## Skills

**Programming & Querying:** SQL, Java, Python, C++
**Web Technologies:** HTML, CSS, JavaScript, TypeScript, Angular, React
**Backend Frameworks:** Spring Boot, Angular, Node.js, Express.js
**Data Visualization Tools:** Advanced MS Excel, Power BI, Tableau

## Experience

**Java Developer Intern** **January 2026 – May 2026**
*Cognizant (Coimbatore)* *Tech Stack Used: Spring Boot, Java, Angular*

- Undertook intensive professional training in **Java Full Stack development**, specializing in building robust enterprise architectures with Spring Boot and Angular.
- Developed secure, role-based RESTful APIs for the *Justice Serve* legal case management system using Spring Boot, Spring Security, and JWT authentication.
- Contributed to microservices-based architecture and collaborated in an Agile team using Git for version control and clean coding practices.

## Projects

**Justice Serve - Legal Case & Court Management System** | Java, *Spring Boot, Angular* **February 2026 – May 2026**

- Built a **Java full-stack legal** case management system using Angular and **Spring Boot microservices**, supporting end-to-end court workflows across 7 user roles.
- Architected 10 independent **microservices** with Spring Cloud API Gateway, Eureka service discovery, and centralized config management for scalable deployment.
- Implemented **JWT-based** role access control across 50+ REST endpoints covering case filing, hearings, judgments, document verification, and notifications.

**Crop Cure - AI-Powered Crop Disease Detection System**| *Python, Flask, React* **September 2025 – December 2025**

- Developed a leaf disease detection web app using React and Flask REST API, enabling users to upload crop leaf images and receive instant AI-powered disease diagnosis with confidence scores.
- Trained a MobileNetV2 CNN model using Transfer Learning and data augmentation for accurate multi-class plant disease classification across multiple crop categories.
- Integrated MongoDB for prediction history, Cloudinary for image storage, and JWT authentication to deliver personalized scan results with pesticide and fertilizer recommendations.

## Certificates

- **Excel Skills for Business – Coursera (2024):** Completed Excel Skills for Business Specialization covering advanced Excel functions, data analysis, dashboards, automation, and business forecasting techniques.
- **Cloud Computing – NPTEL (2024):** Gained foundational understanding of Cloud Computing through NPTEL, including scalable services, resource management, security challenges, and cloud infrastructure concepts.
- **Data Structures and Algorithms – 2023, Programming Pathshala:** Strengthened problem-solving skills through Data Structures and Algorithms training by Programming Pathshala, covering core data structures, algorithms, and optimization techniques.

## Education

**B.Tech. Computer Science and Engineering** **Graduated: 2026** *Lovely Professional University, Punjab* *CGPA: 8.47 / 10*
